

ABSTRACT: A utility, in wall communicating center, fitted in and mounted to wall studding on each side of the cabinet, height of mounting will be determined by usage. The in wall cabinet can be made of wood or plastic materials, designed as a work station, offering a sturdy work desk when lowered to a 90 degree angle, and offering a caller ID telephone, calculator, vinyl note pad, pencil/pen holders.

The pull down desk/door is supported by two door drops supports, in addition to the stop support built into the 12 ½ inch piano hinges that allows the door/desk to be opened to a 90 degree angle.

Plastic holders fitted into the cabinet will house the calculator, vinyl note pad and pencil/pens.
